Art Unit: 1722

1. The following is an examiner's statement of reasons for allowance:

The prior art of record fails to teach or suggest a mold access and storage structure as defined in the claims of the instant application. The prior art is demonstrated by Kato et al. (U.S. Pat. App. Pub. No. 2003/0124210); McGrew et al. (U.S. Pat. No. 3,892,516); and Willingham (U.S. Pat. No. 4,244,682). Kato discloses an injection molding machine that includes a structure for supporting multiple machines vertically, this structure notably including a ladder (122), stage (121), and safety bars (123) (see Fig. 3). McGrew discloses a battery molding apparatus which includes an overhead work area including rails and ladder (see Figs. 1-3). Willingham discloses a portable concrete molding apparatus that can include a surrounding walkway (205) about the top of the structure (see Fig. 38). None of these references, however, teaches or suggests a structure that includes reservoirs with bottom and upstanding walls in combination with the other structures of the mold access and storage structure as recited in the claims of the instant application.

Any comments considered necessary by Applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

2. The prior art also made of record as being pertinent to the instant application is the Husky Annual Report for 1996 (p. 9), which shows an injection molding machine and a walkway structure adjacent to the machine.
